GOLF CLUB

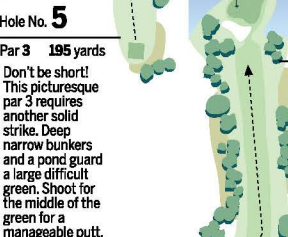

Hole No. 1
Par 4 412 yards
 A beautiful starting hole that plays shorter than the scorecard suggests. A good tee shot leaves the players with a short to middle iron to the green. Bunkers left and right guard a severely undulated green.

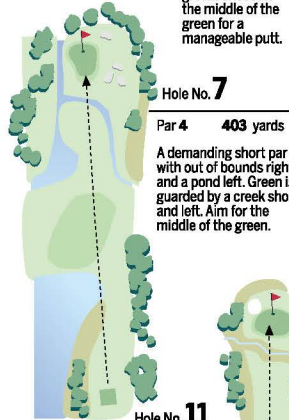

Hole No. 2
Par 3 217 yards
 A long up hill par 3 that requires a well struck shot. Large green is guarded by a bunker right and tall cord grass guards the left side of the hole. Par is a good score here.

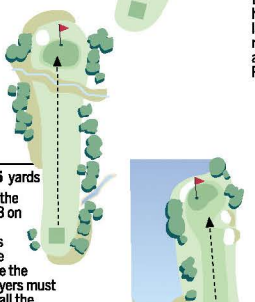

Hole No. 4
Par 4 469 yards
 Keep the tee shot right to allow for a more accessible approach shot. The pond on No. 5 will come into play if the tee shot is left. Green is guarded by cord grass right and a bunker left, aim for the middle of the green.

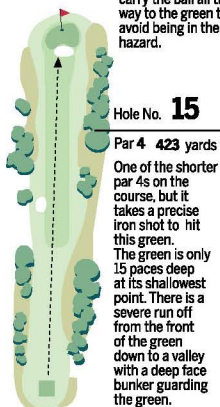

Hole No. 5
Par 3 195 yards
 Don't be short! This picturesque par 3 requires another solid strike. Deep narrow bunkers and a pond guard a large difficult green. Shoot for the middle of the green for a manageable putt.

Hole No. 7
Par 4 403 yards
 A demanding short par 4 with out of bounds right and a pond left. Green is guarded by a creek short and left. Aim for the middle of the green.

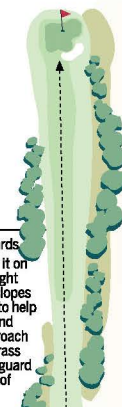

Hole No. 11
Par 3 215 yards
 This could be the toughest par 3 on the course. Swirling winds make this hole hard to choose the right club. Players must carry the ball all the way to the green to avoid being in the hazard.

Hole No. 15
Par 4 423 yards
 One of the shorter par 4s on the course, but it takes a precise iron shot to hit this green. The green is only 15 paces deep at its shallowest point. There is a severe run off from the front of the green down to a valley with a deep face bunker guarding the green.

Hole No. 12
Par 4 488 yards
 A good drive up the right side of the fairway leaves the best approach to this green. Longer players will easily reach this green with an iron but they must be careful not to hit it long. The lake surrounds the entire left and backside of this green. Once the putting surface is reached, players will be faced with subtle contours all over the green.

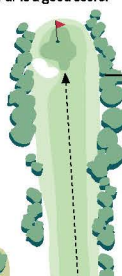

Hole No. 3
Par 4 457 yards
 Grip it and rip it on this long straight par 4. Green slopes back to front to help stop middle and long iron approach shots. Cord grass and a bunker guard the right side of the green.

Hole No. 6
Par 5 536 yards
 A reachable downhill par 5 that demands an accurate approach shot. Water guards the green right, left and long. The No. 1 handicap hole.

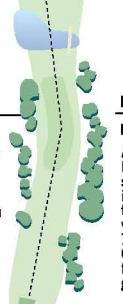

Hole No. 8
Par 4 415 yards
 A dogleg left with trees guarding the left side of the fairway. A good drive leaves players with a short to mid-iron to the green. Green is heavily guarded with large deep bunkers right, a pond short and a steep drop-off left. Par is a good score.

Hole No. 13
Par 4 447 yards
 Don't let the yardage fool you. This plays as the longest par 4 on the course because it is straight up hill. Players must find the fairway to be able to hit the proper shot into this green. The green is elevated with a huge a bunker guarding it.

Hole No. 16
Par 4 424 yards
 A good tee shot will leave players with a good look at the green. Ball's traveling over 280 yards will run down to a low area that leaves a tough uphill shot. Iron shots need to be well struck to get all the way to the middle of the green. Avoid the false front.

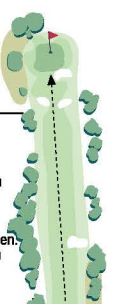

Hole No. 9
Par 4 477 yards
 A long uphill par 4. It takes two good shots to hit this green in regulation. Avoid two very large and very deep bunkers 70 yards from the green. Green is guarded by a front bunker. Par is a good score here.

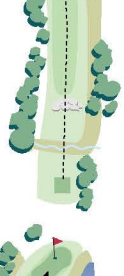

Hole No. 14
Par 3 143 yards
 This may be a short hole but it is well guarded with two bunkers short as well as one long. Balls that land short of the green will roll into the bunkers or into a collection area on the left side of the green. Place your tee shot in the middle of the green and take your par.

Hole No. 17
Par 4 458 yards
 This is one of the toughest holes on the course. This hole is long and has a lateral hazard that wraps around the entire front of the green. The back side of the green has a severe slope that runs down to some of the thickest rough on the golf course. Par is very good score here.

Hole No. 10
Par 4 458 yards
 A downhill par 4 that requires a perfectly placed tee shot. Distance control is a must. Players are then faced with a tricky iron shot to a green that has run off in excess of forty feet. The only place to miss this green is to the right, which will still leave a tough shot with the green running away from the players.

Hole No. 18
Par 5 495 yards
 Tee balls that do not find the fairway will require a tough second shot. Must hit second shot through two large trees that guard both sides of the fairway. Green is elevated 20 feet with two large bunkers guarding short. This is a tricky green to putt because of little nuances and run off. A good birdie opportunity.
