## **Briane Faleto Class A Golf Course Superintendent**

11.50 inches of rain in the month of February and 17.85 inches so far this year. The rain is wreaking havoc on the course conditions. Thank you all for being so patient with us as I think we have been Cart Path Only since Thanksgiving!!!! Hopefully we will get some breaks and the course will dry up.

We are scheduled for our full course fertilization/spring pre-emerge bulk spread on March 3rd. Just depends on if we dry up enough. We will have our pre-emerge attached to the fertilizer so we will get both tasks done at once. This will help any new weeds from popping up. We will need to make the course Cart Path Only the day of, and the following day, to prevent burn. Sorry for any inconvenience this may cause.

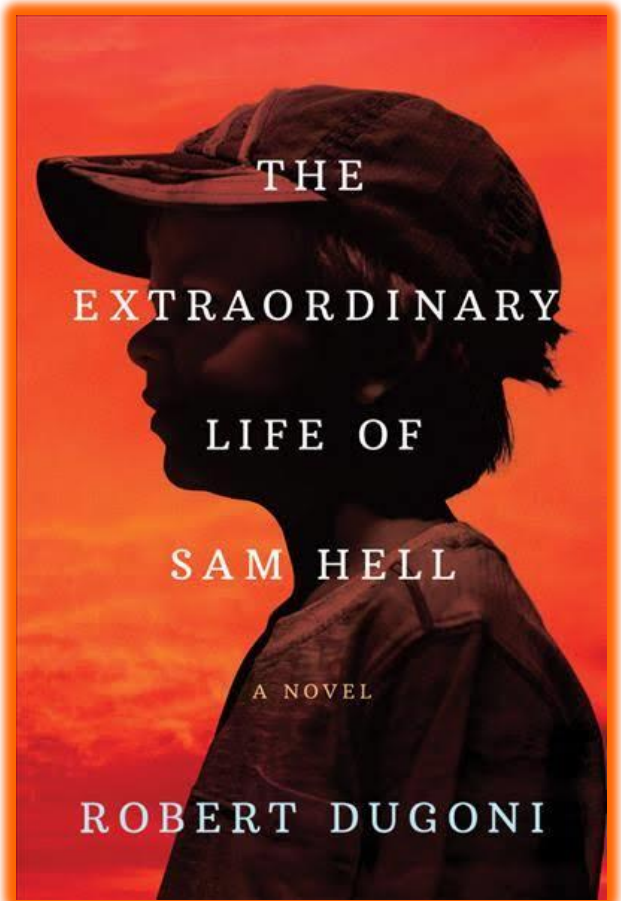

We will be finishing up some of our winter projects in March and preparing for some spring projects. We still have some trees to remove and limbs to take down. We also have some beautification projects to complete this month.

We will slowly start lowering the heights of cut on our mowers this month as the temperatures rise. We will eventually get the greens, tees, fairways, and roughs to our normal cutting heights by the end of the month. Please remember to rake those bunkers and repair your ball marks! We hope to see you out on the course!
